Mia Kellett

Profile

A Systems Engineer specialising in web systems development in the higher education sector. They have a proven background in software development, delivering stable, secure and modular systems in their current role for the Digital Solutions team across multiple projects. They also have proven technical and creative abilities, having achieved a First-class degree in Computer Games Programming from the University of Gloucestershire, working within tight deadlines and leading multiple teams throughout their studies.

Education & Certifications

Plympton Academy:
- 2013 till 2018: GCSE's
- 2018 till 2020: A Levels

University Of Gloucestershire:
- 2020 till 2024: First-class degree in Computer Games Programming BSc (Hons)

Certifications:
- Microsoft Certified: Azure Fundamentals

Technical Skills

Programming Languages:
- C# - PHP - HTML
- SQL - Python - C++

SDK & Framework Experience:
- Blazor - Entity Framework Core
- CI/CD (using GitHub Actions & Azure DevOps Pipelines)

Software Experience:
- Git (both using Azure DevOps repos & GitHub)
- Azure Portal (both from certifications & on the job experience).
- Azure Devops
- HALO ITSM (Service desk management software)
- Linux Server Management (Debian & Ubuntu)

Hobbies / Interests

- I am an avid gamer that enjoys a variety of game genres. Strategy and creative building games are my most favourite as they require you to think about what you are doing to solve problems.
- I enjoy going for long walks hiking in the countryside or woods.
- I am a fan of science fiction media such as Star Trek and Star Wars

Work Experience

University Of Gloucestershire:
November 2024 - Present
Systems Engineer (Web & Automation)
- Responsible for delivery and maintenance of web systems for UoG.
- Developed a variety of bespoke websites, such as MyCourse, using C# .NET & Blazor, whilst also maintaining them so that they remain stable and secure, whilst dealing with any issues that are raised.
- Ensuring service desk tickets for core systems, such as Moodle, are dealt with in a timely manner in order to ensure the staff/student experience remains of a high-quality.

University Of Gloucestershire:
September 2022 - July 2023
Games Research Intern
- Responsible for prototyping applications for clients of the University, with the ultimate goal of creating a proof of concept application by the end of the development.

La Pizza Loca Ivybridge:
June 2021 - August 2021
Pizza Cook / Till Assistant
- Responsible for customer care, taking customer orders through to completion to deliver a high-quality customer experience

Microshade VSM - July 2019
Work Experience
- Assisted in the technical support given to customers & research/planned a media-wiki solution for an upcoming product.
